## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Osaka et al., 6,034,878, in view of Yeager et al., 5,802,583.

Osaka et al., 6,034,878, discloses in Fig. 11 memory system comprising:  
a plurality of memory modules of DRAM type 10-0 to 10-15 **being sequentially wired through connectors C1-1 and C3-1/ C1-2 and C3-2;**  
memory controller 100 including: serial data/write in control signal terminal coupled to switch SW1, serial data/read out control signal terminal coupled to switch SW2.

What is not shown in over Osaka et al., 6,034,878, is the ferroelectric memory devices as recited in claims 1-9 and 11-15.

Yeager et al., 5,802,583, discloses in Fig. 1 a ferroelectric memory device FRAM, which can be used to replace a conventional DRAM (see lines 6-17, column 3), comprising:  
FRAM array 12;  
row decoder 14 and column decoder 16;  
address latches 22 and 24;  
data input/output I/O latch 36.

It would have been obvious under 35 USC 103(a) to one of ordinary skilled in the art at the time of the invention was made to utilize the FRAM device in Fig. 1 of Yeager et al., 5,802,583, for the DRAM modules 10-0 to 0-15 in Fig. 2 of Osaka et al., 6,034,878, for the purpose of partial write protection (see lines 6-44, column 2 of Yeager et al., 5,802,583).

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,646,903. Although the conflicting claims are not identical, they are not patentably distinct from each other because: the at least two ferroelectric polymer memory devices as recited in claims 2-18 of the present invention are obviously read on the at least two ferroelectric memory devices as recited in claims 1-10 of U.S. Patent No. 6,646,903.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to TRONG PHAN whose telephone number is (571) 272-1794. The examiner can normally be reached on M-F (8:30-5:00).
